Hiring Manager

Acuity

Dear Hiring Manager,

I am writing to express my interest in the Programmer Intern position at Acuity for Summer 2026. I am excited about the opportunity to contribute to your team by modifying programming systems to enhance business automation needs. With a strong foundation in programming and a solid commitment to learning, I believe I would be a valuable asset to your organization.

Currently, I am gaining hands-on experience as an AI Systems Engineer Intern at Deepiri AI. This role has allowed me to develop my technical skills in programming languages, enhance my problem-solving abilities, and engage in collaborative projects that demand effective communication. I thrive in environments where I can utilize my initiative and growth mindset, and I am eager to bring this enthusiasm to Acuity.

I have also worked on projects with Simple Media, where I was responsible for developing user-centric web solutions. This experience helped me become skilled in HTML, CSS, TypeScript, and database management using MySQL and PostgreSQL. I take

pride in my ability to understand user needs and transform technical specifications into functional systems — a key requirement outlined in your job description.

Moreover, I possess a well-rounded skill set that includes proficiency in Git and GitHub for version control, which aligns perfectly with the expectations of the Programmer Intern role. I understand the importance of creating thorough documentation for processes, as well as writing, testing, and debugging code to ensure the reliability of programs.

I am particularly drawn to the culture of mentorship and learning described in your job posting. I am eager to learn Acuity's enterprise data design and the systems maintained by your team. The chance to work alongside the Strategic Analytics department and contribute to data-driven decision-making excites me and fits my career aspirations perfectly.

Thank you for considering my application. I am looking forward to the possibility of discussing how my background, skills, and enthusiasm for programming can align with the goals of Acuity. Please feel free to reach out to me at your convenience.

Warmest regards,

Nathaniel Robert Knerr
