Hiring Manager

Acuity

Dear Hiring Manager,

I am excited to apply for the Programmer Intern position at Acuity for the Summer 2026 program. With a solid foundation in programming and a keen interest in developing automation solutions, I believe I would be a valuable asset to your team.

My recent experience as an AI Systems Engineer Intern at Deepiri AI has equipped me with the skills necessary for the responsibilities outlined in your job description. During this role, I honed my programming abilities in Python and TypeScript while also leveraging tools such as Git and GitHub to manage collaborative projects effectively. Additionally, my academic background includes extensive work with MySQL and PostgreSQL, which aligns well with the SQL and database design knowledge you seek.

I am particularly drawn to the collaborative and growth-oriented environment at Acuity. The internship emphasizes a growth mindset, which I embody through my continuous pursuit of knowledge and improvement. I take pride in my problem-solving capabilities and enjoy consulting with users to understand their data needs better, ensuring that

the solutions I develop are both effective and tailored to real-world issues.

Furthermore, I have created and worked on projects like Simple Media, where I not only developed functional code but also tested and documented my work meticulously, ensuring smooth collaboration and communication within my team. You can view the project here: [Simple Media](https://simple-media-henna.vercel.app/).

I am eager to learn more about the programming languages used by Acuity and to contribute to your Strategic Analytics department by developing robust programs and systems that facilitate decision-making. I am enthusiastic about the possibility of growing my skills further and making meaningful contributions to your team.

Thank you for considering my application. I look forward to the opportunity to discuss how my background, skills, and values align with the goals of Acuity.

Warm regards,

Nathaniel Robert Knerr
